ABOUT ME

Physics graduate from the University of Salamanca with a strong background in mathematical modelling, statistics and data analysis. Currently completing a Master's in Data Science at the University of Valencia, with hands-on experience in NLP, Deep Learning and ML pipelines through academic projects and an industry internship. Focused on applying AI and data-driven solutions to real business problems, with particular interest in Generative AI and digital transformation. Seeking junior Data Science or ML Engineering roles.

TECHNICAL SKILLS

Programming: Python, SQL, R

Data Analysis: Data cleaning, EDA, statistical analysis, Matplotlib, Seaborn, ggplot2

Machine Learning: Scikit-learn, TensorFlow, PyTorch

NLP & DL: Transformers, Hugging Face, Whisper, PySentimiento

Data Tools: Pandas, NumPy

Cloud & Tools: Git, Jupyter Notebook, AWS (S3, EC2, SageMaker – basic)

Languages: Spanish (native), English (B1+: professional and technical communication)

EXPERIENCE

Data Scientist Intern

Jul 2024 – Aug 2024

AIR Institute (International Centre for Artificial Intelligence Research)

Salamanca, Spain

Developed ML models for occupational risk analysis, achieving near-perfect classification accuracy (0.98 F1-score) on the provided dataset, validated by research supervisors.

Built a multimodal feature extraction pipeline for candidate analysis using Whisper (speech-to-text) and PySentimiento (sentiment analysis), extracting tone, emotion and linguistic patterns as structured features for downstream screening models.

PROJECTS

Clickbait Detection in News Headlines

Developed an NLP classifier to detect clickbait using cosine similarity, topic modelling and fine-tuning. (Python, Scikit-learn, Transformers).

Calorie Estimation from Food Images

Built a deep learning pipeline for image-based calorie estimation using CNN architectures (Python, TensorFlow, Hugging Face).

Exploratory Analysis of Labour Market Data

Performed EDA on Spanish labour market data to identify gender inequality patterns (R, tidyverse, ggplot2).

EDUCATION

Master's in Data Science

University of Valencia

Sept 2025 – present

Valencia, Spain

GPA: 8.97/10. Key modules: Machine Learning, Deep Learning, NLP, Statistical Learning.

Bachelor's Degree in Physics

University of Salamanca

Sept 2021 – Jul 2025

Salamanca, Spain

GPA: 7.25/10. Focus on mathematical modelling, computational physics and statistics.
